Summary

I am a skilled Full-Stack Developer and IT professional with expertise in system security, information systems development, programming, and networking. I have extensive experience in web and application development, system management, and network security, enabling me to translate complex technical challenges into actionable solutions that drive business growth.

Proficient in a wide range of technologies, my technical toolkit includes **frontend development with React.js, TypeScript, JavaScript, HTML, CSS, and Next.js**, and **backend development using PHP, Java (Spring Boot), and Python**. I am experienced in **database management with MySQL** and adept at using analytical and productivity tools such as Figma, Microsoft Excel, and PowerPoint.

I also contribute to strategic decision-making and business development, leveraging my technical expertise to support organizational goals and deliver innovative, scalable solutions.
